**76th ANNUAL BANQUET—FRIDAY
7:00 P.M.—APRIL 21**

**THE ILLINOIS SOCIETY OF
PROFESSIONAL ENGINEERS**

proudly presents

DR. BEATRICE A. HICKS, P.E.

and

RODNEY D. CHIPP, P.E.

NSPE's Official Engineering
"Ambassadors" to South America

"HOW ENGINEERS CAN IMPROVE U.S. RELATIONS WITH SOUTH AMERICA"

An illustrated presentation

Dr. Hicks and Mr. Chipp, husband and wife team, during conference with Argentinian businessmen in Buenos Aires, March, 1960.

1961 CONVENTION SPOTLIGHTS INTERNATIONAL AFFAIRS

"HOW ENGINEERS CAN IMPROVE U.S. RELATIONS WITH SOUTH AMERICA"

The 76th Annual Banquet of ISPE Friday—April 21, will feature an illustrated presentation on one of America's current dilemmas—SOUTH AMERICAN RELATIONS.

DR. BEATRICE A. HICKS, P.E. (Woman of the Year in Business—1952), President of the Newark Controls Co., Bloomfield, N. J., and her husband, RODNEY D. CHIPP, P.E., Director of Engineering, Communications Systems Inc. (a wholly-owned affiliate of IT&T) spent a month of 1960 touring Brazil, Argentina, Chile, Peru, Uruguay as official engineering "AMBASSADORS" for the National Society of Professional Engineers.

"I think that's a splendid idea, your going down there as engineers," former Vice-President Nixon told the couple after they had described the purposes of the Project Ambassador tour. Mr. Chipp told the Vice-President that they hoped to gather information and impressions in South America which would help foster sound relations between North American and Latin American engineers.

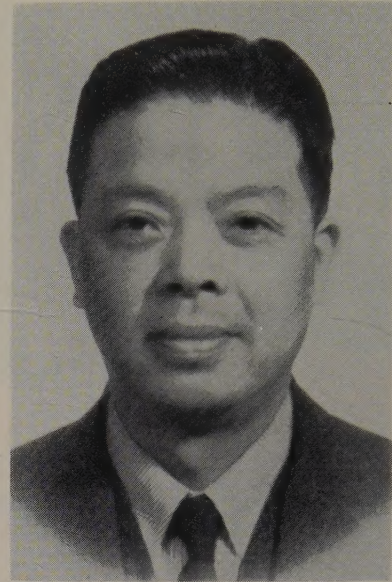

Working in cooperation with the leading professional engineering society in each country visited, the Ambassadors held a series of meetings with South American engineers, government and university officials, and business to explore the less obvious problems in human relations that cause friction between South American engineers and United States engineers. This unique project was undertaken by NSPE in an attempt to forestall any possibility of an "Ugly American" image in the exchange of engineering services between the two great continents of the Western Hemisphere.

In addition to assistance from the American embassies, the schedule of activities by Rod Chipp and Bea Hicks was coordinated by: in Brazil, the Federacao Brasileira de Associações de Engenheiros; in Uruguay, the Pan American Union of Associations of Engineers; in Argentina, the Centro Argentino de Ingenieros; in Chile, the Instituto de Ingenieros de Chile, and in Peru, the Sociedad de Ingenieros del Peru.

In each country they also visited as many outstanding engineering installations as their limited time permitted.

**FOR FUN IN '61
COME TO PEORIA**

"COMMUNIST CHINA IN ASIA"

Lawrence M. Lew

"East is east and west is west and never the twain shall meet"—OR WILL IT? Don't miss the Convention's Keynote address by MR. LAWRENCE M. LEW, Chairman of the Political Science Department and Counselor to International Students at Bradley University. His presentation of "COMMUNIST CHINA IN ASIA" deals with one of the most dangerous problems of our time and will be given on THURSDAY NOON—April 20. His will be the first of many outstanding addresses to be heard at the 76th Annual Meeting of I.S.P.E.

Mr. Lew was born in China and received his education in the University of Nanking. He pursued further study at the University of Chicago. Upon his return to China, he first taught in his Alma Mater and later became Dean of the University.

Once he served as a senior expert in the Ministry of Foreign Affairs and was attached to the Chinese Assessor's Office in connection with the Lytton Commission of the League of Nations. He was professor of political science at St. John's University in Shanghai.

During the last war he became Executive Secretary of the Chinese Relief and Rehabilitation Administration and was concurrently in charge of educational rehabilitation. He was sent to the United States and England in 1946-47 as UNRRA Fellow in administrative science. While in London, he had collaborated with the Chinese delegation to the UNESCO Headquarters in Paris. In 1947 he was appointed Administrative Advisor to the Central Rehabilitation Commission. In 1948 he returned to this country with his family and was appointed to the faculty of Bradley University, Peoria.

I.S.P.E. FUNCTIONAL SECTIONS TO HEAR SPEAKERS FROM KANSAS, MINNESOTA AND ILLINOIS

DOUBLE-FEATURE FOR JOINT SESSION OF HIGHWAY ENGINEERS, ENGINEERS-IN-INDUSTRY, LAND SURVEYORS

FRIDAY—APRIL 21

PROMINENT KANSAS ENGINEER TO APPEAR AT I.S.P.E. CONVENTION

Donald P. Schnacke, 35, Secretary-Manager of the Consulting Engineering Section of the Kansas Engineering Society, will address a Joint Session of three ISPE Functional Sections. On Friday, April 21, the ISPE Building Consultants, Engineers-in-Private Practice and Structural Engineers will hear Mr. Schnacke talk on the organization of the fine Kansas Consulting Engineering Section.

Mr. Schnacke is a native of Topeka, Kansas, married and has two sons. He holds a B.S. degree in Mechanical Engineering from Oklahoma State University and an LL. B. degree from Washburn University. He is a licensed Professional Engineer and has been admitted to the Bar, both in the State of Kansas.

He has been employed in the petroleum industry as an engineer; been in the private practice of engineering, practiced law—all before

Donald P. Schnacke

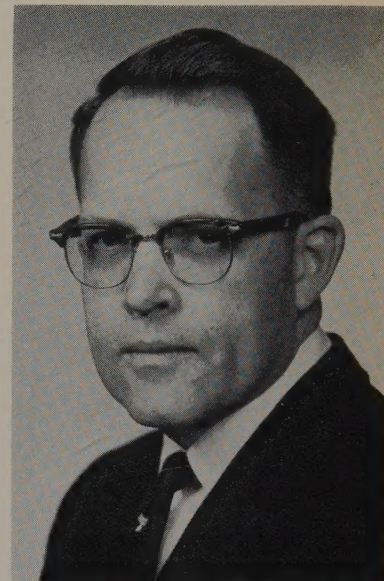

being named as the full-time Secretary-Manager of the Consulting Engineering Section of the Kansas Engineering Society, March, 1958.

Mr. Schnacke is a member of the Kansas Engineering Society, the National Society of Professional Engineers, the Kansas Bar Association and the American Bar Association. He is an Elk and a Lion; his church affiliation is with the First Presbyterian Church in Topeka, serving as a Trustee and this year as President of the Men's Club.

Mr. Schnacke has remained active in politics, working his way up from precinct committeeman to his present work as a County Chairman. He has been recently elected the Kansas State Republican Chairman.

"INDUSTRY AND THE PROFESSIONAL SOCIETY" will be the topic of a second 20-minute address given before a Joint Session of Highway Engineers, Engineers-in-Industry and Land Surveyors.

Mr. John E. JANSSEN, Research Section Head, Honeywell Research Center, Minneapolis-Honeywell Regulator Co., Minneapolis will make this presentation.

John E. Janssen

Mr. Janssen is Past-President of the Engineers-in-Industry Section of M.S.P.E. and the Honeywell Engineers' Club. Three years ago these organizations pioneered the "Sounding Board" theory in industry by leading the fight against professional unionism. The Honeywell Engineers' Club is now affiliated with the M.S.P.E.'s Engineer-in-Industry Section.

Mr. Janssen holds a B.S.M.E. Degree from Iowa State University and an M.S. Degree from the University of Minnesota. His research activities have been concerned with heat transfer and heating and ventilating problems, also measurement of radiation and conduction properties of materials.

He is currently a member of ASME, Association for Applied Solar Energy, Minnesota Society and National Society of Professional Engineers.

"NEW PROFESSIONAL PATTERN FOR HIGHWAY ENGINEERS" will be the topic of a 20-minute address by ROBERT J. NEWBURY, Executive Director, Illinois Society of Professional Engineers, before a Joint Session of Highway Engineers, Engineers-in-Industry and Land Surveyors.

Before coming to Illinois last September, Mr. Newbury had served the Minnesota Society of Professional Engineers for four years as their Executive Secretary. One of the outstanding features of that Society was the

excellent cooperation maintained between the engineers of the Minnesota Highway Department and the professional organization. Bob will give many new and positive ideas for possible implementation in Illinois

to strengthen the working relationship between the engineers in the Illinois Division of Highways and the I.S.P.E. and still add stature to the autonomy of each organization.

Prior to his assignment with the Minnesota and Illinois Societies, Mr. Newbury taught high school in the State of Washington, worked two years in the personnel department at the University of Minnesota, and for three years with the

Robert J. Newbury

International Harvester Company in St. Paul. He holds a B. S. Degree from the University of Minnesota in speech and public relations and will soon receive his M. A. Degree.

HOW THE SUCCESS OF High-Type Asphalt pavement can mean new tax savings for your highway program:

The number one choice of America's state highway engineers for the past two decades has been modern high-type Asphalt pavement. Advances in engineering know-how, in Asphalt technology and in development of the mechanical paver, in 1958 **alone**, increased the use of high-type Asphalt pavement by 618% over the year 1940.

Millions of your tax dollars have already been saved due to the more economical construction and low maintenance costs of modern Asphalt pavement. **Recent engineering advances have developed new DEEP STRENGTH Asphalt pavement which will provide even better performance and pavement economy in the future.** These savings can mean more and better local and interstate roads for you.

Get all the facts now. Write today for free copy of THE BETTER WAY TO BETTER ROADS.

NSPE PRESIDENT TO ADDRESS FRIDAY NOON LUNCHEON APRIL 22

NOAH E. HULL, Houston, President of the National Society of Professional Engineers will address the Illinois Society of Professional Engineers at their noon luncheon on Friday—April 21. The Texan will speak on the national affairs and activities of the 53,000 member National Society of Professional Engineers.

Mr. Hull is Vice-President and General Manager of

the Hughes Gun Company and assistant to the Vice-President-manufacturing of the Hughes Tool Company. Born in Mark Center, Ohio, he received his B. S. Degree in civil engineering from Purdue University in 1917. Prior to his present position he held executive engineering positions with the General Motors Corporation, the Firth Carpet Company and the National Gypsum Company.

Noah E. Hull, P. E.
N.S.P.E. President

A registered professional engineer in three states—Michigan, New

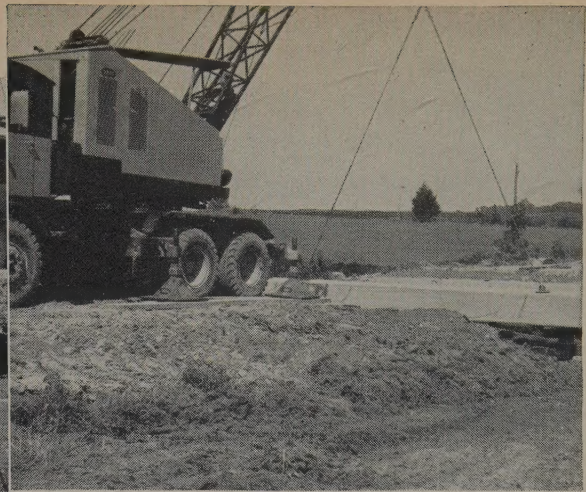

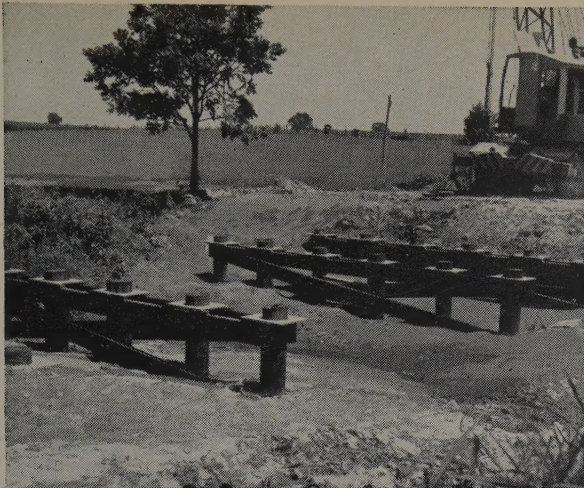

York and Texas—Mr. Hull has also been active in the San Jacinto Chapter and the Texas SPE. He is a past-national director of NSPE and is a former chairman (1955-58) of the Professional Engineers Conference Board for Industry. He is a member of a number of other professional and civic organizations, including the American Society of Civil Engineers.

WILL YOUR CHAPTER WIN NEW ANNUAL AWARDS?

A beautiful new rosewood gavel, with engraved gold band, will be awarded to the Chapter (or Chapters) which has perfect "delegate attendance" at ALL THREE sessions of the House of Delegates. Arthur E. Dini, Credentials Committee Chairman, will officially announce the gavel award winners at the close of the final session.

If your Chapter's six delegates attend all three sessions of the House of Delegates, you can expect President-Elect Sommerschild to present this award at a forthcoming Chapter meeting.

Placing Nelsen precast caps ▲

THREE-SPAN CONCRETE BRIDGE *Erected in* **FIVE WORKING DAYS!***

That's fast time but not unusual for a precast NELSEN Bridge. When you're designing a bridge, you're necessarily interested in structural strength and costs. *Nelsen Concrete invites you to check its standards and to run cost studies on a NELSEN Bridge for any site.* You'll also be sure of fast service when you recommend a NELSEN Bridge—posts, piling, caps, slabs, and rails are always available in standard sizes from stock.

Features of Nelsen Precast Units:

Span Lengths ... 12' to 40' in standard precast lengths.

Loadings... H15-S12-44 and H-20-S16-44 with or without wearing surface.

Tolerances ... depth $\frac{1}{8}$ "; length $\frac{1}{4}$ " in 10'.

Posts... meet or exceed AASHTO requirements.

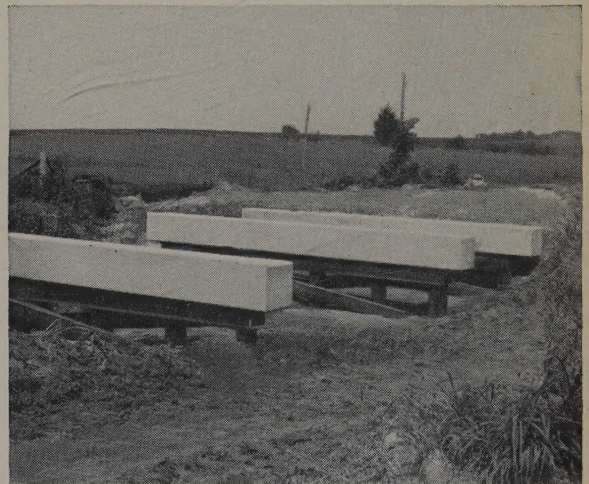

Precast Caps ... dowel holes, crowns, and levelling screws are provided for use with all types of precast caps.

Precast Piling ... 14", 16" in stock; 12" and 18" also available.

Transverse Bridge Slabs ... precast complete with crowns and levelling screws... for long span structures and heavy-duty temporary bridges.

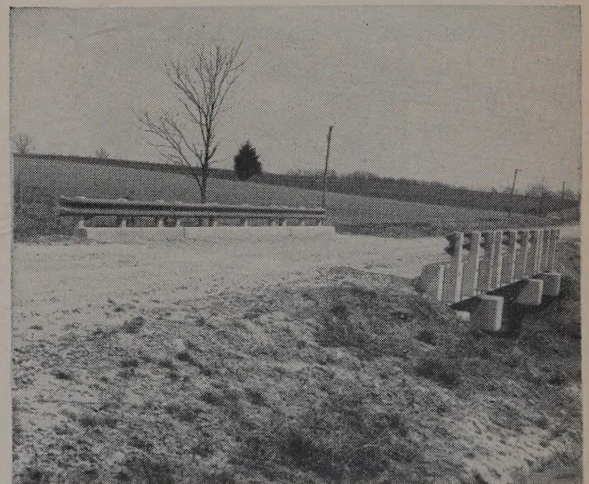

Temporary bridges are also available for rent.

*Details on request

Fire makes the difference

Permanence burned into Dickey Clay Pipe at 2100° F

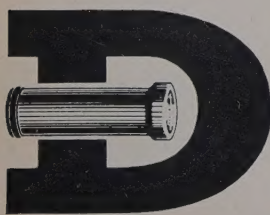

Clay pipe, unlike any other, is born in fire.

Raw clay is chemically inert . . . it's nature's most enduring material. In pipe manufacture, nothing is added to it but water and heat. Tiny particles of clay, subjected to metal-melting temperatures, literally fuse together forming a dense, cohesive mass. The

clay actually bonds itself. This results in a sanitary sewer pipe that is granite hard and completely immune to acids and alkalis found in sanitary sewers.

That's why clay pipe cannot rust, rot, corrode or in any way disintegrate . . . why Dickey Salt-Glazed, Vitrified Clay Pipe serves for generations.

Providing improved sanitation for better living

THE LADIES' CONVENTION PROGRAM

THURSDAY—APRIL 20

- 8:00 A.M. REGISTRATION—SIGN UP FOR TOURS—Upper Lobby Hotel Pere Marquette
Hospitality Room open for free rolls and coffee
- 10:30 A.M. BRUNCH—CARROUSEL ROOM
THEME: "NAME THAT TUNE" . . . Prizes to be awarded
- 12:30 P.M. CARDS . . . CARROUSEL ROOM (Table Prizes)
THREE OPTIONAL TOURS TO BE CONDUCTED:
1. TOUR OF DEMANES FURNITURE & ART GALLERIES
 2. TOUR OF HIRAM WALKER DISTILLERY
 3. TOUR OF GLEN OAK PARK ZOO, CONSERVATORY, & ART & SCIENCE ROOM
- 3:30 P.M. PRESIDENT'S TEA (in honor of all State Auxiliary Presidents)
Illinois Valley Yacht Club
Musical Entertainment
- 5:30 P.M. JOIN MEN FOR EVENING PROGRAM
Cocktail Party, Buffet Supper & Dance

FRIDAY—APRIL 21

- 8:00 A.M. REGISTRATION—Pere Marquette Upper Lobby
Hospitality Room open for free rolls and coffee
- 9:15 A.M. Auxiliary Chatter . . . Hospitality Room
- 10:30 A.M. TOUR OF "JUNCTION CITY SHOPPING CENTER".
- 11:30 A.M. REFRESHMENTS (OPTIONAL)—Vonachen's Junction
- 12:30 P.M. LUNCHEON—Country Club of Peoria
THEME: "THIS IS YOUR LIFE"
Speaker: BEA HARRIS from Palace Gift Shop
Favors and Door Prize
- 3:30 P.M. TOUR OF PALACE GIFT SHOP and shopping in downtown Peoria (OPTIONAL)
- 6:00 P.M. JOIN MEN FOR EVENING PROGRAM
Cocktail Party, Dinner & Dance

APRIL 20-22, 1961

A NEW ISPE

By L. D. HUDSON, *President, ISPE*

The strike of the ISPE gavel at 9:00 A.M., April 20, 1961, in Peoria will usher in a new sound for an ISPE session; and, for two days, the "heartbeat" of the Society will be heard.

Convened at the Hotel Pere Marquette will be the 26 delegates from the 21 operating chapters. Each chapter will have its own table at the assembly. Seats will also be available for the general membership. The voices of the chapter delegates will add new emphasis to the opinions of the chapters; and, the assembly will recognize the voices of the individual members. As the 75th year of Society fades into history, the pulse of a sensitized ISPE will be obvious. This will be from the real heart of our operations —from the individual.

L. D. Hudson

The growth of the Society from a small group to an

impatient but solid membership of over 3600 is proof of this.

Personal appearances of no less than twenty committee chairman will be made before the house of chapter delegates and members. Each will have this opportunity to be seen and heard. There will then be opportunity for pointing new projects toward the "hopper" of the Board of Direction.

Because the special interests of each member are requiring more and more attention, the new functional groups will begin their meetings at 9:00 A.M. on the 21st for a half day of business and orientation. The entire membership will be invited to observe and catch the ideas behind the surging interests that they have. These activities have developed as part of the three basic membership desires: 1) for local expression in the chapter and community; 2) for professional development instrumental to business improvement; and 3) for protecting the framework of the profession which provides a rewarding living.

See you at the meeting

CONCRETE PIPE-O-GRAM

THE CONCRETE PIPE INDUSTRY IS GEARED FOR THE 60'S.

LARGE INVESTMENTS IN IMPROVED CONCRETE PIPE—

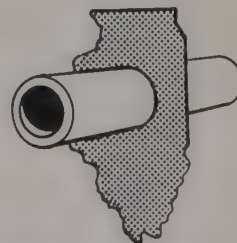

NEW MACHINERY, RESEARCH AND QUALITY CONTROL—

BETTER SERVE THE CONSTRUCTION INDUSTRY

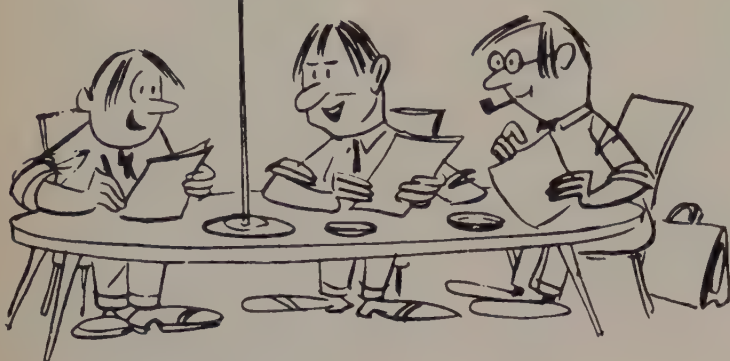

AND THE PUBLIC IN DRAINAGE AND SEWERS.

REGIONAL CHAPTER OFFICERS' CONFERENCES SET

Francis Murray, Joliet, ISPE CHAPTER ACTIVITIES CHAIRMAN, announces that THREE REGIONAL CHAPTER OFFICERS' CONFERENCES ARE BEING SCHEDULED FOR THE MONTH OF MAY. These Conferences are to be attended by CHAPTER OFFICERS AND COMMITTEE CHAIRMEN. Each conference will have a WORKSHOP FORMAT.

SATURDAY, MAY 6, 10:00 A.M.—SOUTHERN CONFERENCE, SOUTHERN ILLINOIS UNIVERSITY, CARBONDALE, ILLINOIS

CHAPTERS: MADISON COUNTY, AMBRAW, ST. CLAIR, EGYPTIAN

SATURDAY, MAY 13, 10:00 A.M.—CENTRAL CONFERENCE, STATEHOUSE INN, SPRINGFIELD, ILLINOIS.

CHAPTERS: WESTERN, PEORIA AREA, BLOOMINGTON AREA, CHAMPAIGN, CAPITAL, CENTRAL ILLINOIS.

SATURDAY, MAY 20, 10:00 A.M.—NORTHERN CONFERENCE, HOLIDAY INN MOTEL, U.S. Hwy. 51 @ Samuelson Rd. (near airport), ROCKFORD, ILL.

CHAPTERS: ROCKFORD, LAKE COUNTY, ROCK RIVER, DUKANE, WEST CENTRAL, ILLINOIS VALLEY, JOLIET, BEVERLY, CHICAGO, SALT CREEK, SAUK TRAIL, NORTH SHORE, NORTHWEST SUBURBAN.

CHAPTER PRESIDENTS will soon have detailed information and reservation cards for the various conferences. If YOU are a Chapter officer, or Chapter Committee Chairman, PLAN NOW TO ATTEND THE CONFERENCE PERTAINING TO YOUR AREA. This one-day training orientation will aid greatly in your Society endeavors next year.

JOLIET STUDENT CANDIDATE FOR ARMCO-NSPE SCHOLARSHIP

A. L. Dierstein, Chairman of the ISPE Education Committee, announced the selection of GEORGE C. PAULSON, 18; Joliet, as the ISPE candidate for national competition for one of the ARMCO-NSPE four-year civil engineering scholarships.

George Paulson, a senior at Joliet Township High School, is the only son of Rev. Raymond H. Paulson (deceased) and Mrs. Dorothy M. Paulson, 704 McDonough St., Joliet. Mrs. Paulson is employed by the Silver Cross Hospital.

In addition to being a member of the National Honor Society, George has been Class President, President of the Student Council, Pres-

George C. Paulson

ident of the Episcopal Young Churchmen, and winner of the Church Camp Cross. He has also participated in basketball and track.

Eight other fine scholarship candidates made the selection job of the ISPE Education Committee most difficult. They were:

Donald L. Bill, Roanoke, Ill.
Albert J. Gouwens, South Holland, Ill.
David R. Hancock, Granite City, Ill.
Roger Carroll, Jr., Handeland, Aurora, Ill.
Albert G. Kolb, Streator, Ill.
Thomas C. Minor, Chicago, Ill.
Paul Larry Shriver, Rock Island, Ill.
Paul H. Schmidt, Springfield, Ill.

The Illinois Society of Professional Engineers wishes to thank all the students for their interest in submitting applications, and extends best wishes to George Paulson for success at the national level of scholarship competition.

FIFTH I.S.P.E. LEGISLATIVE DINNER ENJOYED BY 400 ON MARCH 21

How to cut sewer pipe costs \$\$\$\$

4 WAYS with STREATOR CLAY PIPE *with AMVIT JOINT*

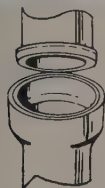

Buy just the size you need—AMVIT joint can not leak. No need to use "oversize" pipe to handle infiltrated ground water.

Just push spigot into the bell—No jointing material required. Watertight, root-proof joint is installed at the factory.

Test as installation is complete—Save time and labor as no waiting is required for jointing compounds to cure.

Fill trench immediately—Clear streets quicker as AMVIT joint permits immediate backfilling as soon as installation is complete.

It will pay you to learn all about this Streator AMVIT joint which makes Streator clay pipe even more valuable for every type of sewer installation. Why not call today?

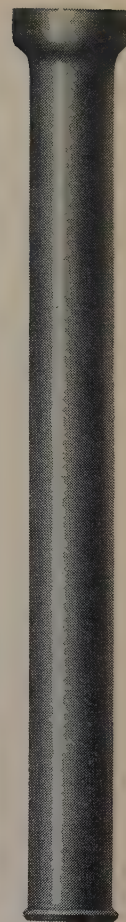

Amvit plastic joint saves time and money... most economical in the long run. Write or call for complete information.

JOLIET AUXILIARY FORMED

The Women's Auxiliary to the Joliet Chapter of the Illinois Society of Professional Engineers observed its "CHARTER NIGHT", Thursday, March 23rd.

Special guests for the evening were ISPE President and Mrs. L. D. Hudson and the Reverend and Mrs. Clarence Ploch of the Ottawa Street Methodist Church of Joliet.

L. to R., Mesdames Larson, Gates, Anderhous, Hassert, Gilbert and Miss Keeler.

After dinner, Advisor to the Auxiliary Mr. Bernard Anderhous, acting as Master of Ceremonies, introduced

WESTERN SOCIETY TO HEAR ISPE EXECUTIVE DIRECTOR

Robert J. Newbury, ISPE Executive Director, will address the WESTERN SOCIETY OF ENGINEERS at their noon luncheon on Wednesday, April 26, in their headquarters, 84 E. Randolph St., Chicago. Mr. Newbury has chosen "PROFESSION PROFILE" as his topic of the day.

Donald F. Reinert, Chairman, W.S.E., Civic Committee, announced that Mr. Newbury's address would be followed by a 10-minute question and answer period.

President Hudson. Mr. Hudson gave an interesting talk on the history of Women's Auxiliaries in Illinois and their value to the parent chapters. At the conclusion of his address, he presented the "Charter" to Mrs. James Gates, President of the newly formed auxiliary, the ninth in the State of Illinois. Twenty-one Charter members signed the new document.

Other officers of the auxiliary are: Vice-President, Mrs. Howard Hassert; Secretary, Mrs. Don Larson; Treasurer, Mrs. Bernard Anderhous; Directors, Miss Helen Keeler, Mrs. Lloyd Gilbert and Mrs. Robert Brown.

You can't recognize your Amvit Man

by
the
shoes
he
wears

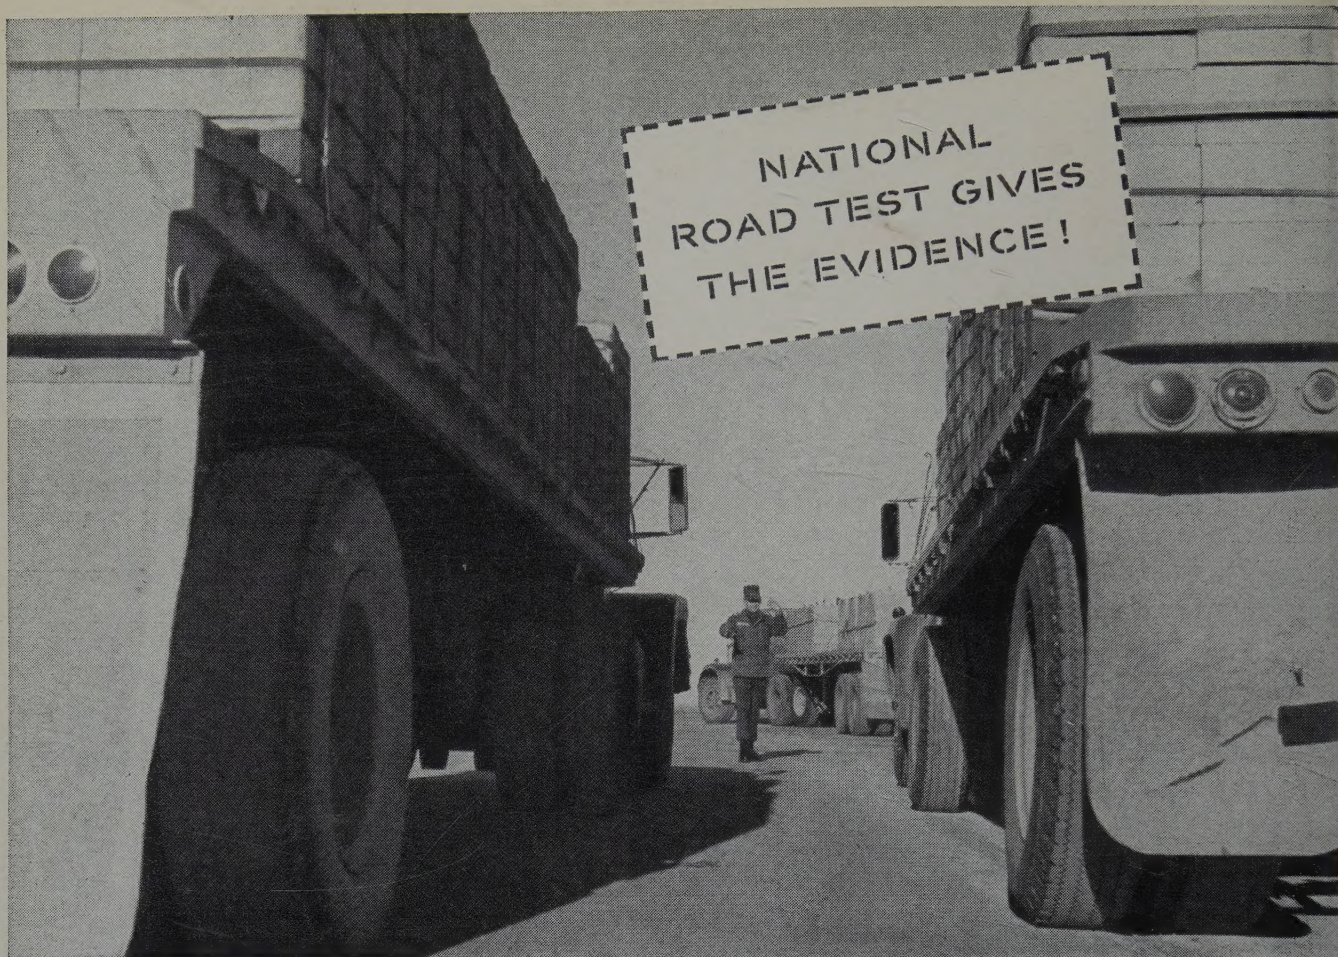

HE HAS SO MANY OF THEM. When you start talking sewer pipe, he'll first wear his "business" shoes—because he's all businessman when he's helping you specify the type of joint and kind of pipe that will do the best job for you. Then, he'll switch to his "engineers" boots and work with you on installation and construction problems. If necessary, he'll then put on his "running" shoes to track down your order and check to make sure that your Amvit clay pipe is shipped on schedule, and that all details of your order were handled to your complete satisfaction. And when you need him, your Amvit man will put on his "hip" boots, roll up his sleeves and get right into the ditch to help you with the tough problems that come along. Call your Amvit man—he's a good man to have on your team!

Concrete wins over asphalt these basic ways...

Sponsored by The American Association of State Highway Officials (AASHO) . . . directed by the Highway Research Board of the National Academy of Sciences—National Research Council. Here is the most scientific pavement test ever made. Accurate instrumentation checked performance of test sections during 2 full years of traffic, 99 trucks, 19 hours daily, 6 days a week. There were 17 million miles of travel—1,113,762 load applications!

Your state helped finance this test to provide better highways . . . maximum value from every tax dollar.

1

DURABILITY

A count of pavement sections surviving in the great National Road Test, after two full years of traffic, showed concrete outlasted asphalt 3 to 1! Here is new confirmation that concrete gives more for tax dollars.

2

DRIVING COMFORT

In ratings of how test pavements retained the riding quality they started with, concrete won over asphalt by a wide margin. Only concrete can give lasting driving comfort and do it without excessive upkeep.
